It includes vocabulary and a glossary related to the topics and is intended to help with writing a research proposal and a literature review, presenting data in various graphical and tabular formats, avoiding plagiarism, writing scientific articles, and improving your English through listening, reading, writing, and speaking. The textbook takes a task-based approach and includes a variety of activities designed to help students enhance their language skills in real-world scenarios. The activities can be used in both practical classes with students and for self-study. By offering students with hard tasks and questions that encourage thought and self-evaluation, the handbook becomes more interactive.
